IMPORTANT INFORMATION:

Please read the below text prior to completing the 'Description of Foal' and 'Description of Mare' diagram on page 3.

The diagrams on page 3 must be sufficiently detailed to ensure the positive identification of the foal in the future. **White markings must be shown in red. If there are no white markings, this fact must be stated.** All head and neck whorls should be marked (X). Other whorls should be similarly recorded in foals which may turn grey and in foals lacking sufficient other distinguishing marks. Acquired marks and other distinguishing marks e.g. prophet's thumb mark, walleye, etc. should always be noted. If a microchip has been implanted please mark the location with an arrow.

Please use the Fédération Equestre Internationale (FEI) [Identification of Horses with the narrative and the diagram](#) document when describing the mare and foal markings and scars. This document is designed to simplify the identification of horses and attempt to standardise the many technical details required for the narrative and diagram for the horse's passport.
